Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 31-37, drawn to a device for guiding webs of partial width in a processing machine.

Group II, claim(s) 38-40 and 56-63, drawn to a device for guiding webs of partial width in a processing machine.

Group III, claim(s) 41-46, drawn to a guide element for guiding a web of partial width in a processing machine.

Group IV, claim(s) 47-55, drawn to a guide element for guiding a web of partial width in a processing machine.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: In group I, the recited common support for a registration device and a guide element being movable on a further guide element transversely in a direction of an incoming web of partial width is not required by Groups II-IV. In Group II, the recited non-driven roller and the registration roller each having axes of rotation substantially aligned vertically in respect to an alignment of a lateral frame of the processing machine is not

required by Groups I, III and IV. In Group III, the recited guide element having a width transversely to a running direction of the web of partial width which is less than a maximum web to be processed in the processing machine is not required by Groups I, II and IV. In Group IV, the recited non-driven roller having a roller body with separately rotatable sections arranged side-by-side in an axial direction and each separately rotatable section having a width transversely to a running direction of an incoming web of partial width that is less than a maximum full web processed in the processing machine is not required by Groups I-III.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

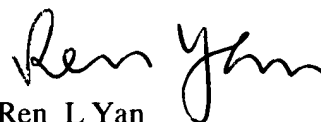

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ren L. Yan whose telephone number is 571-272-2173. The examiner can normally be reached on 8:30am-5:00pm.
